

Instructions for Plan Presentations

Ilpo Koskinen
24 Sept, 2007

- You **HAVE TO** present your thesis in an roughly 45 min slot once during the seminar
- This is an important feedback point!

- Make a Powerpoint slide set (or similar)
- Plan for 20 min:
 - explain (2-3 minutes, 1-2 slides)
 - motivation for the thesis
 - the problem(s)
 - how you aim to tackle it (10 min, 2-4 slides)
 - through design, research...
 - your "lens"
 - the process of study, design, etc.

- explain also
 - schedule in sufficient detail
 - budget (if relevant)
- expected outcomes
 - their significance
- main risks
 - foreseeing them -- and preparing for them -- is a part of your skill set!

- Think about the listener:
 - your job is to be so clear and frank that the listener understands your key points
 - ...this best guarantees succesful feedback
